

The Co-creative youth project

The new Erasmus+ project “Co-creative youth” aims to promote initiatives in the reuse sector and sustain the employability of young people.

The project progress

On the 20th and 21st May the project partners have united for the second transnational meeting in Namur (Belgium). The first day of the meeting was dedicated to the analysis of results of the national desk researches and round tables organized with the stakeholders in order to exchange good practices and provide the partners with the instruments needed to complete the territory plans in every partner country. The collected data were summarized in the Overall State of Art report that will be available for download on the project website by September 2017.

On the second day of the meeting a visit to the “La Ressourcerie Namuroise” was organized by the hosting organization, AID. The visit was very informative and appreciated a lot not only by the partners, but also by the stakeholders from Corsica, who also attended the meeting.

Local promotional activities

Project partners' give very high attention to the effective promotional activities. The first events were organized in each partner country during the **European Week of Sustainable Development**. The events were registered on the dedicated website of EWSD to increase the visibility: <http://www.esdw.eu/>

To learn more about these past event, as well as to be updated about all future Co-creative Youth project initiatives, follow us on the Facebook: www.facebook.com/cocreativeyouth

Future plans

The next phase of the project will be dedicated to the finalization of the National Territory projects, creation of the Tool box for project leaders in the reuse sector, development of the Curriculum and the content for Blended learning course. In October 2017 the partners will meet again to evaluate the work progress and to prepare the pilot of the abovementioned outputs.
